ANDROID TV BOX

REMOTE CONTROL

1 POWER BLOCK

1 HDMI CABLE

BRIEF INSTRUCTION

HOW TO SET UP ANDROID TV BOX

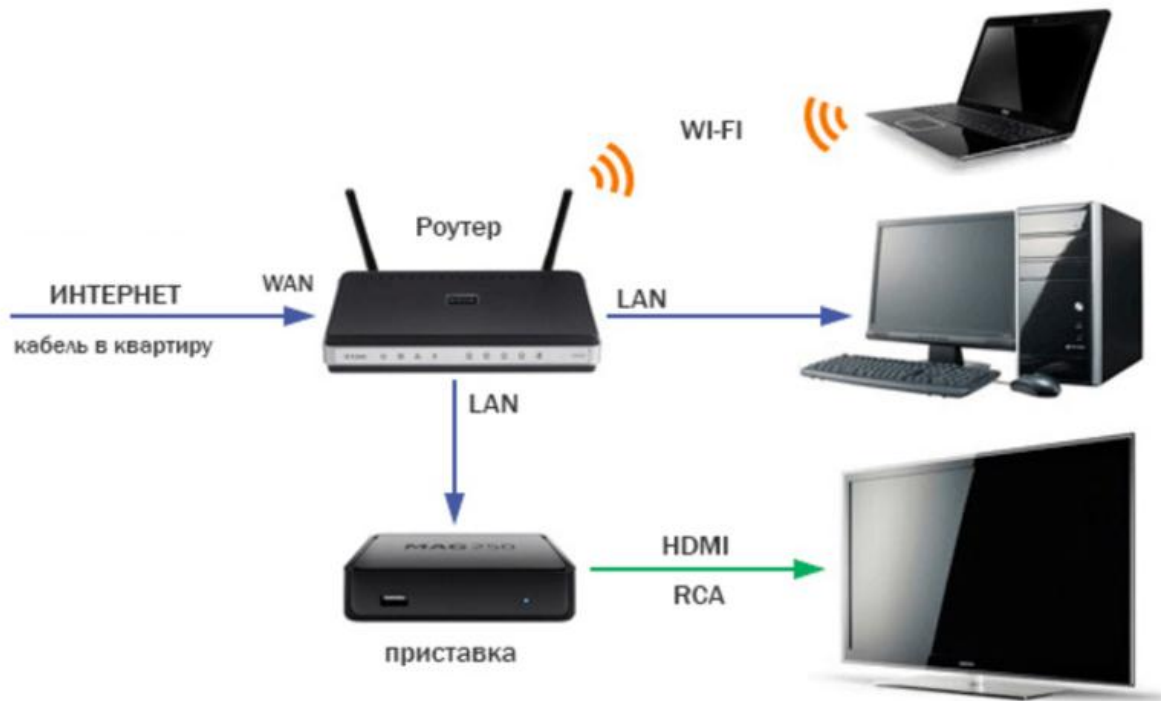

AND INTERNET TV APPLICATION

IPTV ANDROID

OJSC «KYRGYZTELECOM»

1

CONNECTION

1. Connect the set-top box to your TV with HDMI cable
2. Connect the set-top box to an Internet modem or router with a LAN cable

2

MANAGEMENT

We offer IR remote control for Android TV set-top boxes. This remote control is powered by 2 standard AAA batteries.

This model will replace the standard remote control, which is equipped with a large number of modern Android TV set-top boxes.

The remote is equipped with a mouse function, which allows you to control the mouse cursor on the screen with buttons. The remote has an on/off button. The home button will return you to the main desktop from any open application.

3

SETTINGS

FROM SITE

When you turn on the set-top box for the first time, the settings wizard will appear where you will need to make the necessary settings step by step:

1. Select a language, for instance, Russian
2. Select the time zone, for instance UTC+01:00 Berlin, go down to “Apply” and press “OK” on the remote control
3. You need to download and install special software of IPTV KT application on your phone, tablet, TV or set-top box. Direct link to go to and install it on your device: <http://vk.cc/cBTWY>
4. Installation proceeds like any other application

4

УСТАНОВКА

BY APK-FILE

When downloading the APK installation file (file on a hard drive - USB flash drive), you need to perform the following steps:

1. Download the APK file to your device. If you want to update the previous version of the program, it is better to uninstall the existing application on your device and perform a new installation
2. Allow installation of programs from unknown sources in the settings (you need to do it once, then everything will be done automatically)
3. Install the APK using the file manager on your device.
4. Launch the installed IPTV KT application

5

TV VIEWING

Today, more and more people in Kyrgyzstan are switching to digital television.

Visual view window

Weekly program menu

Digital television is:

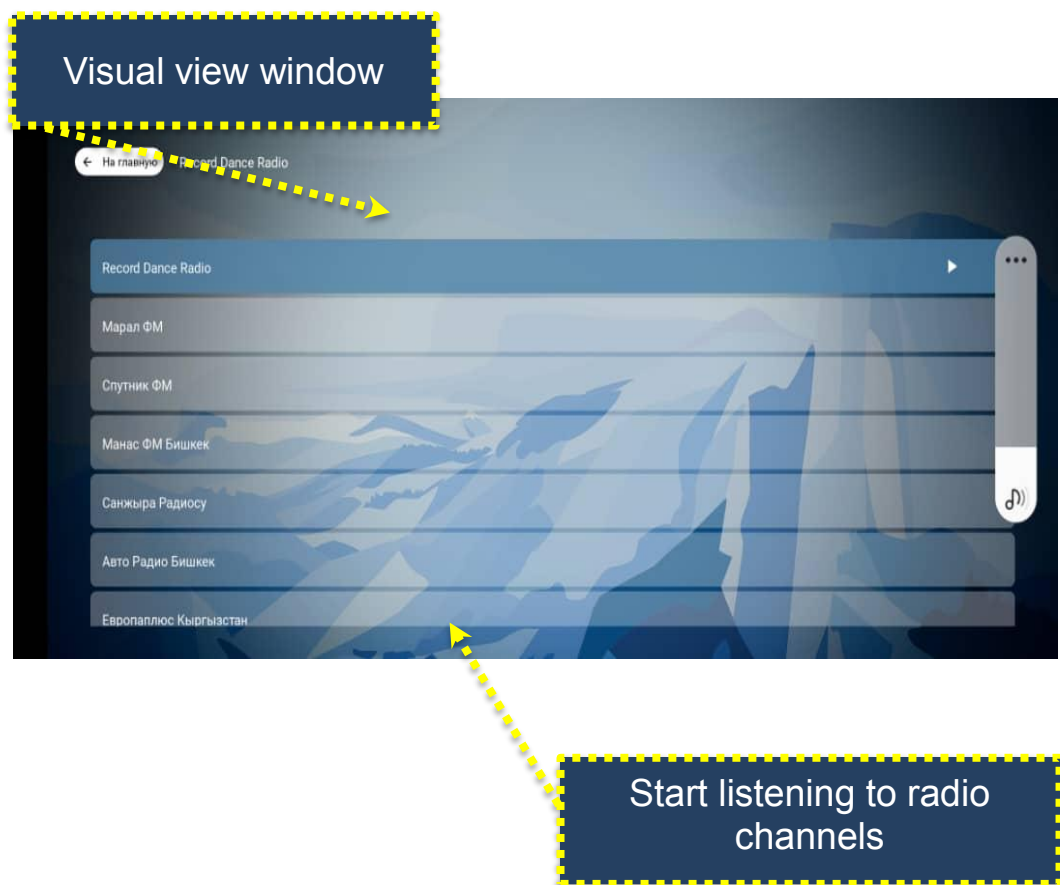

- *High quality sound and picture without interference*
- *External factors do not affect the quality of broadcasting*
- *Sufficiently large list of TV channels allows a wide choice of options for viewing*

At the moment, there are more than 150 channels in the broadcasting grid of OJSC “Kyrgyztelecom”

6

RADIO CHANNELS

The task of radio broadcasting is to maintain an unbreakable link between generations, representatives of all confessions and different ethnic groups.

We are able to fill the airwaves with historical, exclusive reports and unique materials from the archives of Kyrgyz radio “Golden Fund”.

Our airwaves feature the voices of prominent Russian and foreign politicians, businessmen, economists, public figures, writers, artists, athletes, etc.

7

TV VIEWING

Attention!

To move through the menu items use the arrows on the remote control and confirm your selection by pressing "OK"

IPTV KT – impeccable picture and sound quality.

Support high resolution and multi-channel sound that can create the illusion of a real movie theater set up at home.

The application desktop, or launcher, is the main screen through which you interact with the console – launching and managing applications, system configuration, etc.

Start watching TV channels

Launching radio channels

Launching the Youtube application

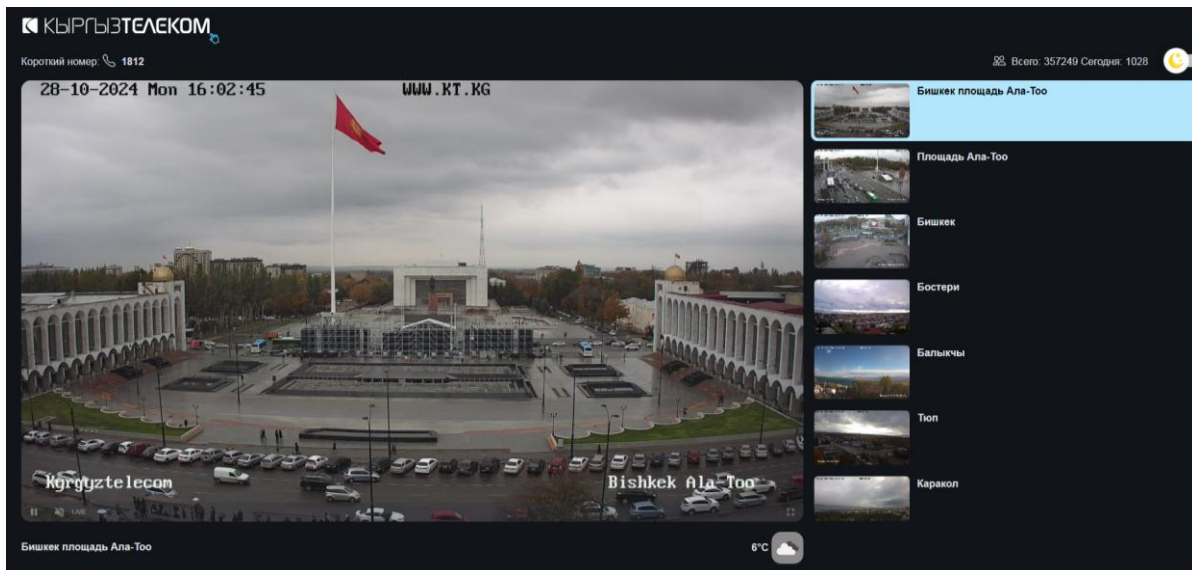

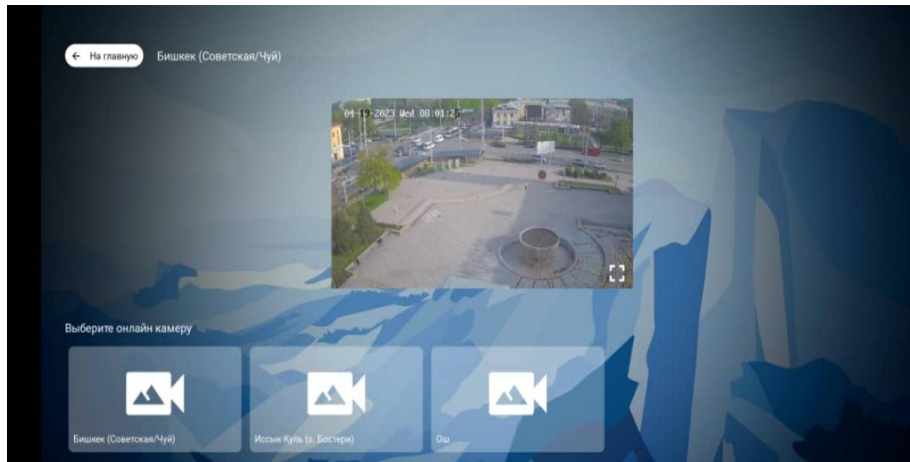

8
